

FOR THE WORLD AHEAD.

BMW AND THE FUTURE OF MOTORCYCLING.

Most manufacturers merely talk about the technical features of their bikes; really practical information tends to be rather rare.

You are just as unlikely to find answers to the important questions of the future. This creates the impression that motorcycles are unaffected by the increasing restrictions which traffic and environment place on our mobility. Our aim is to give you advice and tell you the most important things to consider today when buying a motorcycle. Things you ought to be aware of. We want to draw attention to the motorcycle's true values; quality, reliability and ease of maintenance, for example. And, of course, what makes riding a BMW such fun.

Look through this catalogue and you will soon realize that BMW does everything it can to ensure maximum safety, plenty of enjoyment and motorcycling with a clear conscience.

K 1100 LT ABS

The K 1100 LTA returns this year as the premier performance touring machine. Equipment levels remain the same, with new colors and a special edition model complete with pin stripes.
